

WAX BEAN

holland - select
zaden – seeds

HS 769

HS 769 is a very early maturing variety which makes it a nice addition to all planting programs. A combination of HS 769 (early) with Voltage (late) is highly recommended. It has a good yield potential and its plant setting allows for easy harvesting.

Disease package:

Bean Common Mosaic Virus V1

Anthraxnose

Halo Blight (*Pseudomonas*)

TRIAL DATA

Maturity	-2
Pod Length	12-13 cm / 4.7-5.11"

Disease package	BCMV / A / Ps

Trial data are based upon laboratory observation and commercial trials in many different countries. Results and characteristics are influenced by many environmental conditions and local practices beyond our control. There is no warranty for yield and quality.

Holland-Select b.v. is a privately owned seed company based in the Netherlands, we started early 1900. We run a research, maintenance, production and sales program of PVP-varieties. The production is a worldwide operation. We are also certified to produce and handle organic seeds. The quality of the seeds is checked in our own and official laboratories.

Our breeding techniques are innovative and advanced but our varieties have been developed without using GMO-techniques.

Holland-Select b.v. is a NEN-ISO 9001 certified company. The certificate ensures consistent management and procedures resulting in high quality products.
